

excel<sup>★</sup>4 apps

**Fast, Not Furious**  
Accelerate SAP FICO processes  
with the ease of Excel.

# A 360° Financial Solution

Excel4apps lets you easily manage financial processes in Microsoft Excel with access to real-time data. Our self-service reporting and data-loading solutions install quickly and integrate seamlessly with SAP. This approach reduces your reliance on IT resources and streamlines Excel-based processes. We help you get more out of the platforms you already own – Microsoft Excel and SAP.

# Stop

# ~~export-~~ ~~reformat-~~ ~~repeat-~~ ing.

Frustrated by your existing manual or IT-dependent tools? Our Excel-based solutions are effective and user-friendly alternatives to the standard ERP tools that keep you at the office late with the export-reformat-repeat approach.

*Excel-Based Alternatives to:*

**Report Painter**

**BEx Analyzer**

**SAP Custom Reports**

**Standard SAP Planning T-Codes**

**SAP Business Planning and Consolidation (BPC)**

**Hyperion**

**Business Objects (BOBJ)**

**SAP Business Warehouse (BW)**

**Analysis for Office**

**SAP Query**

**Custom SAP uploading programs**

## Report + Analyze

Excel-based reporting solutions for SAP FICO enable real-time data refreshes with ad-hoc inquiry and drill downs to line items, documents, and attachments. This means you can spend time analyzing the data, not exporting and formatting it.
