

# Excel4apps and SAP S/4HANA: Superior Real-Time Excel Integration

## Business Users and Excel

With S/4HANA, SAP will provide a number of new reporting and analysis options, including Fiori dashboards to visualize the KPIs of the business and more real-time reporting with Business Objects. However, most business users will continue to need to analyze data in their preferred tool for analysis - Excel. Wands for SAP provides real-time, plug and play, user self-service reporting directly in Excel. With superior usability and flexibility compared to Analysis for Office, Wands for SAP has no need for IT resource time in Design Studio, offering the highly flexible, ad hoc Excel reporting that business users need out of the box.

## GL Wand for SAP – Built Specifically for the Needs of FI and CO. Now Leveraging the Power of HANA.

GL Wand leverages a formula-based approach that is particularly intuitive for business users. New Excel formulas allows users to build detailed, very precise and well formatted reports against S/4HANA data. Design reports in whatever layout is needed, on the fly, with only Excel skills. Column by column, row by row – have FI CO data where you want, when you want it, in real-time with all the formatting capabilities of Excel. Drill immediately to Line Items and Documents with rapid performance from your SAP HANA system. Refresh Excel reports with a click of a button and modify reports in seconds with just Excel skills.

## More Options for Superior Real-Time Excel Reporting and Analysis

- Reports Wand for SAP allows business users to run their familiar SAP T-Code reports live in Excel, with all the formatting and analysis capabilities they're comfortable with today. No HANA views required.
- Are you considering a HANA Sidecar System? Excel4apps may be able to help you get more return out of your Sidecar investment leveraging the power of SAP.
- Still planning your roadmap to S/4HANA? Have real-time Excel-based reporting today with Wands for SAP, no HANA required. Compatible with both ECC 6.0 and S/4HANA.

## Get More Out of Your HANA Investment with Wands for SAP:
